MIG WELDING Transmig 275 Compact & Remote

TRANSMIG 275 COMPACT & REMOTE

- ▲ 240 volt input
- ▲ Huge 275 amp output @ 40% duty cycle^
- ▲ 24 voltage settings
- ▲ Heavy duty 4 roll wire feeder system
- ▲ Covered 8 metre interconnection cables
- ▲ Heavy duty 50mm Dinse connectors
- ▲ Swivel mounted wire feeder with wheels
- ▲ 3 year warranty*

The Transmig 275 is a single phase MIG plant ideally suited to rural and heavier maintenance applications where only 240 volt power is available. Offering one of the highest outputs and duty cycles on the market, the Transmig 275 provides superior arc characteristics for gas metal arc welding (GMAW) and flux cored arc welding (FCAW).

The remote wire feeder features a heavy duty 4-roll drive system that is swivel mounted, with wheels, and supplied with 8 metres of covered interconnection cables, no job will ever be too big or too far for the Transmig 275!

NOTE: Optional digital meter kit fitted for display purposes only.
