TIG WELDING Transtig 200 AC/DC

Transtig 200 AC/DC

VRD

Power source
Part No. 700719

Complete plant
Part No. 700735

The Transtig 200 AC/DC is a brand new release, 240 volt, 15 amp, full digital control, AC/DC, stick/Lift TIG/HF TIG inverter power source. With features like high frequency start, lift arc start, up/down slope, AC/DC pulse, repeat (latch) function and spot mode, you've got the ultimate unit designed for precision TIG and MMAW welding of all weldable materials. Ideally suited for light fabrication and maintenance of aluminium and stainless steel. The 200 AC/DC also has an integrated Voltage Reduction Device (VRD) for improved operator safety.

Features:

- ▲ Standards compliant built-in Voltage Reduction Device
- ▲ Designed for AS1674.2 category A, B & C environments
- ▲ Intelligent fan operation, heat sensing, operates on demand
- ▲ Embedded micro processor with digital controls
- ▲ Exceptional AC and DC welding characteristics and arc control
- ▲ Fully adjustable weld parameters
- ▲ Easy to use digital display and panel controls
- ▲ HF start TIG, Lift TIG & MMAW modes
- ▲ 2T, 4T with up/down slope & repeat function
- ▲ Intelligent self diagnostic operation
- ▲ Single index control knob
- ▲ Portable, compact & lightweight
- ▲ IP23 rating for outdoor use
